

Vermont's new Above Ground Storage Tank (AST) rules regulate the design, installation and inspection of consumer heating oil tanks. They also provide spill prevention and inspection requirements for tank owners and fuel suppliers. The rules allow dealers to "red tag" a non compliant tank and put it out of service in order to prevent a spill. VFDA has a low cost option for members who need these tags. Please fill out the information below and fax or mail back to VFDA.

For more information contact VFDA — 802-223-7750.
