

Vermont Aboveground Storage Tank Rules & NORA Oil Tank Seminar — NOR-22

October 18, 2017 — 2:00 pm to 4:00 pm *This course offers 2 NORA CEUs*

VFDA Classroom - 963 Paine Turnpike North - Berlin, VT

Make sure your front office staff, fuel drivers, and heating technicians know the rules.

The Tank Seminar will focus on the proper the design, installation and inspection of consumer heating oil tanks. It also provides an overview of spill prevention and inspection requirements for tank owners and fuel suppliers.

The State of Vermont requires all aboveground fuel oil storage tanks be inspected once every three years. Tanks must also be inspected upon first fill. According to the regulation, anyone inspecting a tank must either attend this seminar or hold a NORA Bronze, Silver, or Gold Certificate — or a current Vermont Oilheat Certificate of Fitness.
