

Environmental Technician - Fuel Systems Inspector – Eclipse Division – ATC Group Services, LLC

ATC Group Services LLC – Eclipse Division is seeking Fuel Systems Inspector to work out of our Waterbury, VT office. The candidate for this position will be working in our Eclipse division; a high energy environmental services group specializing in petroleum UST Compliance Services.

Job Responsibilities include but are not limited to:

- Perform routine inspections and evaluations of components involved in the total fuel systems management equipment including all parts of the UST system.
- Knowledge and application of the rules and regulations related to UST compliance on a local, state, and federal level.
- Installation of components, education of clients and employees, and troubleshooting of those components.
- Close and frequent interaction with clientele and general public at site locations.

Basic Qualifications:

- High school diploma or equivalent.
- Ability to work effectively and efficiently on your own with little supervision.
- Mechanical aptitude is a must.
- Ability to meet physical qualifications including lifting requirements for the job.
- This position requires extensive travel to job sites on a daily basis, as such candidate must be able to meet the ATC's driver safety criteria.
- Good organizational and multi-tasking skills and clear and concise communication skills, as well as clear analytical thought processes.

Desired Qualifications:

- Bachelor's degree in a related field.
- Technical understanding and insight.
- Knowledge of UST systems.
- Knowledge of national and state petroleum regulations.
