GREMLIN® Tank Monitors Expands Its Product Line of Heating Oil Tank Monitors to Include 4G LTE Models

Fort Lauderdale, FL, February 2019 - Angus Monitoring Service, LLC (AMS) is pleased to announce the launch of our newest tank monitors. The heating oil tank monitor will use 4G LTE cellular service, allowing data to transmit immediately after installation. *“We continue to listen to our customers and develop products to meet and exceed their needs. By creating and offering this new heating oil tank monitor we are able to honor our promise to these fuel marketers by providing best-in-class technology and support with all of our solutions.”* says Phil Baratz, president of AMS.

The new GREMLIN Heating Oil monitor will provide extended coverage and a dedicated bandwidth using CAT-M communications. *“While listening to our clients’ recommendations, we determined the need to innovate our heating oil monitor to provide another connection option in addition to the homeowner’s Wifi”* says David Montgomery, Client Relationship Manager for GREMLIN tank monitors.

New Features and Performance

The GREMLIN heating oil 4G LTE monitor will offer the same core features as our other GREMLIN products and will provide a larger coverage area. All of the GREMLIN tank monitors include features such as a dealer app for mobile installation, back-office integration, a custom dealer branded app, 7+ year battery life, low upfront costs with approved financing and continuing end-to-end support pre, during and post deployment.

About GREMLIN Tank Monitors, an Angus Monitoring Service, LLC product

Angus Monitoring Service, LLC is a wholly owned subsidiary of Angus Energy, a company with a 25-year track record for bringing the most innovative ideas to the propane and heating oil industries. Angus Energy brings together heating oil and propane industry expertise to create solutions that directly impact our clients’ bottom line performance.

Angus Monitoring Service differentiates itself in this competitive environment with our data-driven approach to solutions and product development. Using data as our guide, we provide dealers with actionable information to make timely and informed decisions for their business while supporting our solutions with unrivaled support.
